fisi prim

From 3 months old

Refreshes
and soothes

con ingredientes naturales
ARNICA + Harpagofito + Ruscus

Calms, soothes
and refreshes
the skin

What is an Arnica Stick and what is it used for?

- Arnica sticks for bumps and bruises often form part of the emergency first aid kit for children at an age when they're prone to falling while playing.
- If there's a bruised knee in the playground, an arnica stick will be produced from a handbag to relieve the pain and reduce the bruising.

A safe product

- Refreshes and soothes the skin after minor bumps with its combination of natural ingredients –Arnica + Harpagophytum + Ruscus–.

- When gently applied to the affected area in roll-on format, it produces a pleasant sensation that soothes children's skin. It can be used from the age of 3 months and applied as often as necessary.
